RE: Agenda Item – 2018-19 Non Public Transportation Routes

The district is required to either provide transportation or pay the students Aid-in- Lieu of Transportation if the cost of providing said transportation exceeds \$884 per student. For the past several years we have provided transportation to students who attend Paul VI and Gloucester Catholic High Schools. Based on the most recent Non Public Transportation Route Costing Report, it would be more cost effective to pay the students attending these two school Aid-in-Lieu of Transportation than actually provide the bus. This will also free up bus drivers for in-district routes.
