Introduction

In April 2020, Governor Murphy issued an executive order that became PL2020, c.27. This law provides for the continuity of instruction in the event of a public-health related district closer so that school districts can utilize virtual or remote instruction to satisfy the 180-day requirement.

This Emergency Virtual Learning Plan would be implemented during a district closure lasting more than three consecutive school days due to a declared state of emergency, declared public health emergency, or a directive by the appropriate health agency or officer to institute a public-health-related closure.

Calendar

The GPSD 2021-2022 Calendar has been adjusted to allow teachers and staff additional time to prepare for virtual learning and distribute laptops. This will make September 8th the first day for students.

Any additional adjustments will be posted to the [district website](#).

Technology and Instruction

Devices

GPSD will issue a district-owned laptop to all students, K-12. Students who prefer to use their own device at home may do so. All students who need a district laptop will complete a GPSD Technology User Agreement in PowerSchool. Students will be held accountable for any negligent or intentional damage to the device, power cord, or bag.

Technology support will be available to all families. All students will be able to submit a work order ticket for repairs to helpdesk@gpsd.us, or parents can call 856-652-2700 ext 6611.

Schoology

Schoology is a Learning Management System (LMS). All instruction for grades 4 through 12 will be communicated through Schoology. Teachers will share schedules, course information, and other updates via Schoology or email.

Seesaw

Seesaw is also an LMS which will be used for students in grades K - 3. Teachers will share schedules, activities, course information, and other updates via Seesaw or email.

Learning Experiences

Online learning during an emergency closing will consist of synchronous and asynchronous learning experiences, live lessons in real time, and recorded instruction from teachers daily through Zoom and our LMS platforms. Our classrooms are now equipped with *ClearTouch Interactive Panels*, wireless headphones and keyboards, and wide-angle digital webcams to facilitate simulcasting. All Teachers have access to *Screencastify and KAMI* to enhance virtual learning.

Students will be able to complete offline activities independently as well as meet virtually in small breakout groups, allowing for more individualized attention.

Socialization will also be afforded through team meetings, virtual clubs, and morning meetings.

Equity and Engagement

GPSD students will be provided with the physical and emotional resources needed for successful online learning.

Physical Resources

Laptops will be provided to all students grades K to 12. Those families without reliable home WIFI can visit [everyoneon.org](https://www.everyoneon.org) to learn if they qualify for low-cost internet programs. Additional resources are also available in the GPSD Technology User Agreement.

Our technology department will work with families to ensure equitable access for all students, including hotspots for our students who need them. Teachers will notify building administrators, who will alert the technology department of students needing WIFI hotspots.

Emotional Resources

In this challenging time, social distancing can lead to isolation, and building relationships has never been more important. All stakeholders are working to ensure that students have access to social and emotional support. Collaboration and social interaction will be woven into the fabric of instruction and extra-curricular online activities. Our Guidance Department will work with families to provide counseling and proactive support for students in need. If you have a concern about your child's emotional well-being, please contact your building Guidance Counselor for assistance.

Pupil Services

The Glassboro Online Academy will support all students who receive special services through our many support programs;

- **Special Education** services will be provided to students in accordance with their Individualized Education Program (IEP) by their teachers and support staff through live virtual meetings and assignments through Schoology/Seesaw. Case managers will contact parents if any updates need to be made to IEPs to reflect learning objectives and related services, which will be delivered virtually.
- **English Language Learners (ELL)** will be supported by their ELL teachers, including adaptation of lessons and home communications where necessary.
- **504 Accommodations** will continue to be supported in an online format. For questions, please contact your guidance department.
- **GTALP (Gifted & Talented)** programs will continue virtually to ensure the needs of our exceptional students are met.
- **Basic Skills** support will also continue for students needing remediation as determined by state and local assessments.
- **Social and Emotional (SEL)** well-being support will be available for students through school counselors, case workers, and school psychologists. Teachers will receive additional training so that they will be able to best meet the SEL needs of our students.
- **Meal services** will be provided to students in the event of a closure, but unlike the 2020-2021 closure, meals will not be delivered to families; instead, they will be provided as grab and go meals at specific locations, such as Bullock School or Glassboro High School. In the event of an emergency closing, details would be provided via School Messenger, the district website, and social media.

Attendance

We realize that flexibility must be balanced with accountability when it comes to attendance in online classes. We believe that students need to adhere to a schedule in order to be productive and successful. Our attendance policy strikes that balance.

At the elementary level, students will have two opportunities per day to be marked as present.

At the secondary level, students must be present for a morning homeroom check-in live via Zoom.

Grading

While grading has returned to Pre-Pandemic standards, if GPSD is closed for a considerable period of time, certain policies may need to be reviewed.

We have established a consistent number of assignments for each grade band. Grades four to six will have 4 summative and 16 formative assignments. Grades seven to twelve will have 2-4 summative and 8-10 formative assignments. These guidelines will provide a grading system compatible with virtual instruction and learning.

Sample Schedules*

The minimum hours of instruction for a virtual or remote day is **four hours** excluding lunch and recess.

*These schedules are from 2020-2021 and are subject to change. Building principals will send updated schedules if needed.

- ✓ Special education services will be scheduled throughout the day.
- ✓ Students will receive live instruction during synchronous instructional blocks.
 - Students will also be engaged in small group instruction, discussion groups, and asynchronous instruction.
- ✓ Open Classroom sessions allow teachers to review the days' lessons with those who attend and offer feedback.
- ✓ There will be daily and weekly assignment deadlines for both synchronous and asynchronous sessions.

Assessments

Students will be tested using the NWEA MAP Growth benchmark assessment early in the school year. This measurement tool is suitable for online administration and will give teachers a snapshot of current student performance. Students will also take the NJDOE START STRONG test in September, a standardized test intended to provide a snapshot of the amount of support students are likely to need during the current school year.

Learning will continue to be assessed by teachers through assignments, projects, video conferences, and LMS tests and quizzes in order to inform instruction and provide support for growth.

Student work will be graded using clear rubrics, and feedback will be specific and ongoing so that all students can be successful.

Digital Citizenship

We all recognize that as students are currently taking classes online, it is more important than ever that they know how to be responsible digital citizens. Elements of safe internet use will be interwoven within lessons and activities.

Students are expected to engage respectfully with people of different viewpoints, recognize facts from fiction, and make ethical and honest decisions in their internet use.

Glossary of Terms

ASYNCHRONOUS LEARNING When learners participate in an online learning course at different times, it is known as asynchronous learning. Asynchronous learning allows learners to go through an assignment at their own pace and on their own schedule.

FLIPPED LEARNING Also known commonly as the Flipped Classroom in the field of education, flipped learning switches the lecture/instructional element of learning away from the face to face environment to the learner's own time, allowing them to take in information at their own pace. Face-to-face education can then focus on discussion and interaction, facilitating lively discussion.

LEARNING MANAGEMENT SYSTEM (LMS) A Learning Management System (LMS) is a software application for the administration, documentation, tracking, reporting and delivery of online education courses or training programs. The technology platform through which students' access online courses, a LMS generally includes software for creating and editing course content, communication tools, assessment tools, and other features for managing the course.

SYNCHRONOUS LEARNING When learners participate in an online learning course at the same time but in different locations, it is known as synchronous learning. Synchronous learning allows learners to interact with the instructor and other participants. This is done through software that creates a virtual classroom.

VIDEO CONFERENCING Video conferencing refers to the use of video technology (both hardware and software) to create a virtual meeting between two or more people in different physical locations. Participants can see and hear each other through this technology.

VIRTUAL CLASSROOM The virtual classroom refers to a digital classroom learning environment that takes place over the Internet rather than in a physical classroom. It is implemented through software that allows an instructor and students to interact.

WEBINAR A webinar is a seminar or workshop in which the facilitator and participants view the same screen at the same time. Usually the webinar has an audio component that the facilitator controls and functionality that allows participants to chat by entering text, answering polls, raising their hands and asking questions.
