## **MEMO**

---

To: Dr. Mark Silverstein, Superintendent of Schools

From: Dr. Robert Preston, Chief Academic Officer

Date: December 10, 2020

Re: Action Memo

December 16, 2020 Board Meeting

---

Requesting Board approval for the following Rowan Professor and students to have virtual interaction with GHS students beginning in January 2021. This professor and these students are part of the Biomedical partnership with Rowan called BEAM: BioEngineering and Me.

The B.E.A.M: BioEngineering and Me program is a partnership with Rowan University and Glassboro High School's Biomedical Academy and Biomedical Club. This will replace the name of the current KINDLE Program that has been running since 2016. The mission of the BEAM Program is to inspire high school students to attend college and major in the field of Biomedical Engineering. Undergraduate students, graduate students, and professors will work to build community with our high school students to create interactive, informative content to share and encourage students to enter this field.

1. Dr. Sebastian Vega
