RE: Borough 5 Year Capital Plan Update

Drew Sole and I met with Borough representatives on January 24th to discuss the Borough funded five year capital plan.

1. High School Bleachers – Borough engineer has inspected the structure and work should begin shortly.
2. High School Press Box – Borough engineer and construction official have inspected the structure. It has been determined the press box structure is sound and will only need a new roof. Borough will use small balance of funds from the sale of the Elsmere School for this project.
3. Emergency Generators – Borough will request fund in 2018 to replace the emergency generators at the Bullock School and GHS.
4. Tennis Courts – Borough is investigating the possibility of obtaining Green Acres funding for the repair of the tennis courts.
