

CompleteCare Health Solutions Program

CompleteCare's Health Solutions Program offers parents the option of having their children seen for healthcare during the school day.

Upon consent, children will be picked up from the school by a chaperone and driver than transported to the nearest CompleteCare Health Network health center. Once their care is complete they will be returned to school with a notice of what was completed during their visit.

Services Include:

Dental

Health Solutions offers students comprehensive dental care including exams, x-rays, fillings, and other dentistry as needed. CompleteCare has a team of dentists at five convenient locations throughout South Jersey who will ensure that each child has their individual needs met to help them build happy, healthy smiles that last a lifetime. Since poor dental care can often impact a child's ability to learn and concentrate this program often greatly benefits both students and schools.

Medical

CompleteCare offers a variety of medical healthcare services to students through our Health Solutions Program. This includes much-needed annual wellness exams, sports physicals, immunizations and more. CompleteCare health centers are located throughout South Jersey and locations offer both pediatric providers, as well as family medicine doctors and nurse practitioners who specialize in care for every age.

Behavioral Health

Behavioral Health is the newest addition to Health Solutions, offering students the chance to attend group therapy sessions with the guidance of a Licensed Clinical Social Worker. In the group setting students benefit from interacting with their peers to work through issues like anxiety, depression and more. Group therapy has been proven to benefit students as they learn coping skills, increase self-esteem and gain help to overcome feelings of loneliness and isolation.

Eye Care

The ability to see clearly can have a tremendous impact of a child's school performance, that is why CompleteCare has recently added vision services to its Health Solutions Program. CompleteCare staff will transport students to meet with an eye doctor and if needed help children and their families select a suitable pair of glasses at an affordable price.
