Sounds fine, Frank. I'll await further instructions.

Great, we are looking at the week of March 24. I will let you know the details as we get closer to finalizing our plans here.

Frank,  
We are now in position to have you come in and do the testing on a weekday, any day after March 20<sup>th</sup> during the month of March. If you decide to do in April, we'll need to discuss the options. I'll await your decision.  
Walt.

Frank,  
We can have you in while students are present. However the following will need to be performed prior to the testing:

1. We will need to have French & Parrello address the Intermediate School staff as Ed Hamilton did prior to the last test. I will ask the building Principal when the next staff meeting is scheduled and see if it can accommodate F&P's schedule.
2. I will need to meet with the Operations committee on March 19 and provide them the opportunity to be updated and ask questions.

Therefore, we are probably looking at a date toward the end of March. Does that meet your objectives?  
Walt.

Do you have a problem with us coming in while the students are present?

Frank

I asked the client about days off between now and March 31 (the end of heating season per VIG) but there are none. The only exception is March 11; the students have a half day and the teachers will be in afternoon training.

Would you be able to set the IA cans and do the soil gas borings in the afternoon on March 11? If not let us know what date you propose.

Regards,

C. Dudley Warner, III LSRP
