
**GLASSBORO PUBLIC SCHOOLS
DISTRICT PROJECT UPDATE
OCTOBER 2020**

District Wide Projects

High School

- Hallway Bulletin Boards with the transite boards have been removed and all clear given by EDI

GIS

- Steeple window was blown out at some point, that window, back facing fields, was boarded up by Precision Construction Consulting.
- White annex building behind GIS is continuing to fall into disrepair more and more. Raccoons have gotten back in and roof is leaking, whole by chimney, and drop ceiling has fallen in. Need to find a place to store the documents and think about demolition of this structure.

Bowe

Bullock

- Starting phase of LED lightning is in the process of being installed in throughout the building, moving along hallways just about completed, as well as bathrooms.

Rodgers

Beach Admin.

DISTRICT WIDE

- Back ordered supplies still coming in and we should be fine for the Hybrid start up in November. Will continue to make sure we are well stocked.
- All work orders are being done in a timely fashion and all crews are continuing with building cleaning and disinfecting.
- Custodial Staff in the district is working on small projects to keep everyone busy, painting is one of the biggest things being done.
- Looking to have the entire district on the cellular system for fire and burglar alarm since eventually the POTS lines will be discontinued.
- 3 choices for the electronic workorders for the district.
 - rSchooltoday \$1620.00 initial cost, \$1250.00 annually
 - eMaint \$7300.00 initial cost, \$3300.00 annually
 - Schooldude \$5493.19 initial cost, \$2060.00 annually
 - The system George Weeks uses for IT would take about 6 months or more for us to set this up to work something like the maintenance ones above. These are all ready to go and made for facilities and maintenance to start right away. rSchooltoday has a facilities scheduler as well, which I am sure they all do, and the cost with them is initial \$3529.00, \$1199.00 annually.
