### General Directions:

Please input the total number of general education three- and four-year-olds, broken down by classroom location (In-district, Charter, Head Start, Private Provider) that your district plans to serve in the full-day preschool program for the 2025-2026 school year.

Input a 0 (zero) if you are not serving any students in the setting listed.

Students with IEP's should not be included in the general education count. Students with IEP's that will be served in PEA classrooms should be input where indicated. Do not include students who will be placed in self-contained classrooms in this count.

If your district's children are served in neighboring district programs, the district of child's residence should include them in their projection; they should not be counted in the receiving district's projections.

The total number of students in each setting should be divisible by 15, which will be represented in the number of projected classrooms.
