Re: Resolution – Auditing Services

---

The NJ Schools Insurance Group awards school districts grant allotments from the underwriting surplus for the previous program year. This year the allotment awarded to the Glassboro School District is \$8,979.00. The application for the grant has been submitted, it is recommended that the board ratify the following resolution recognizing the application submission to NJSIG. The project description is as follows:

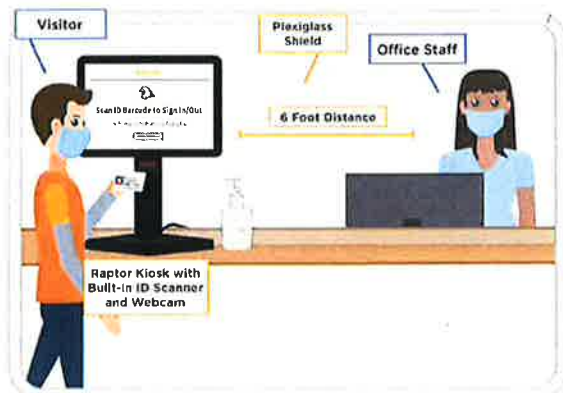

1. The purchase of two Raptor Visitor Management Kiosks for the Intermediate and High Schools. This will enable the facilitation of visitor sign in, screening and the ability to produce visitor badges in a contactless manner. The Kiosks will reside in the security vestibule and the visitor will not be allowed entry into the school building until completing the process and receiving clearance. GHS has a designated greeter; at Intermediate it will be Debbie Kersey (security aide). The systems are portable. Attached are two informational items about the kiosk system and a short demo video of the kiosk can be viewed through this link: [Open](#)
2. The purchase of Exit Stopper Multifunction Door Alarms for Double Doors. This not only presents a visual warning to anyone trying to open exterior doors from the inside of the building but also an alarm will sound if the doors have been opened. This allows the district to have additional safety and security measures, preventing staff or students from opening or propping open doors that should remain closed. – Please see attachment.
3. The purchase of a Portable Lockout Kit (Electrical/Valve) to protect all stakeholders. The lockout kit provides a wide range of lockout applications, and the kit provides necessary components to ensure that equipment is either de-energized or locked out in accordance with OSHA regulation 1910.47. – Please see attachment.

# CONTACTLESS VISITOR MANAGEMENT: Assisted Main Office Check-In with Kiosk

## Traditional Assisted Check-In

- In a traditional set up, both the Raptor ID Scanner and the Raptor Badge Printer are placed next to the front office staff.
- Each visitor hands a government issued photo ID to the front office staff who then inserts the photo ID into the Raptor ID Scanner.
- After scanning and screening, the front office staff hands back both the photo ID and the printed visitor badge to the visitor.

## Contactless Assisted Check-In with a Kiosk

- For contactless check-in with kiosk option, the Raptor Self-Service Kiosk is placed at least six feet from the front office staff and in front of the visitor. Ideally a plexiglass shield or similar separates the front office staff from the visitor.
- The visitor scans his or her government issued photo ID with the Raptor Self-Service Kiosk built-in ID scanner, selects the destination, and enters responses to optional custom health questions used by the school.
- First time visitors may take their photo with the built-in webcam directly at the kiosk. Face masks can be removed for this process as it only takes a few seconds.

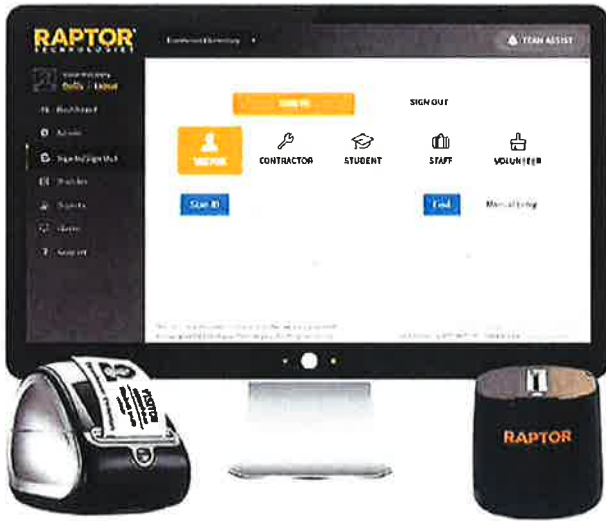

## Contactless Badge Hand-off

- Once the visitor is approved, office staff clicks "Submit & Print" and a visitor badge will print out next to the office staff.
- The badge should be placed under or to the side of the shield by the front office staff and retrieved by the visitor maintaining at least a six foot distance.

## RAPTOR® VISITOR MANAGEMENT

**Know precisely who is in your schools.** The system lets you easily screen and track everyone coming into your schools and keep unwanted entrants out. The system screens for sex offenders, alerts staff of custody issues, and provides district-wide reporting for all visitors. The system has five modules: visitor, contractor, student, staff, and volunteer.

### INSTANT CUSTODY MATCH & SEX OFFENDER SCREENING

Screen each and every visitor against databases listing custody and guardianship orders and banned visitor status, as well as sex offender databases in all 50 states.

### PHOTO BADGES & COMPLETE VISITOR RECORDS

Help staff recognize approved visitors with printed badges, including the person's photo, name, time stamp, reason for visit, and destination. Generate accurate, reliable district-wide visitor records and reports with a complete sign-in history for every person entering your schools.

### SILENT ALERT

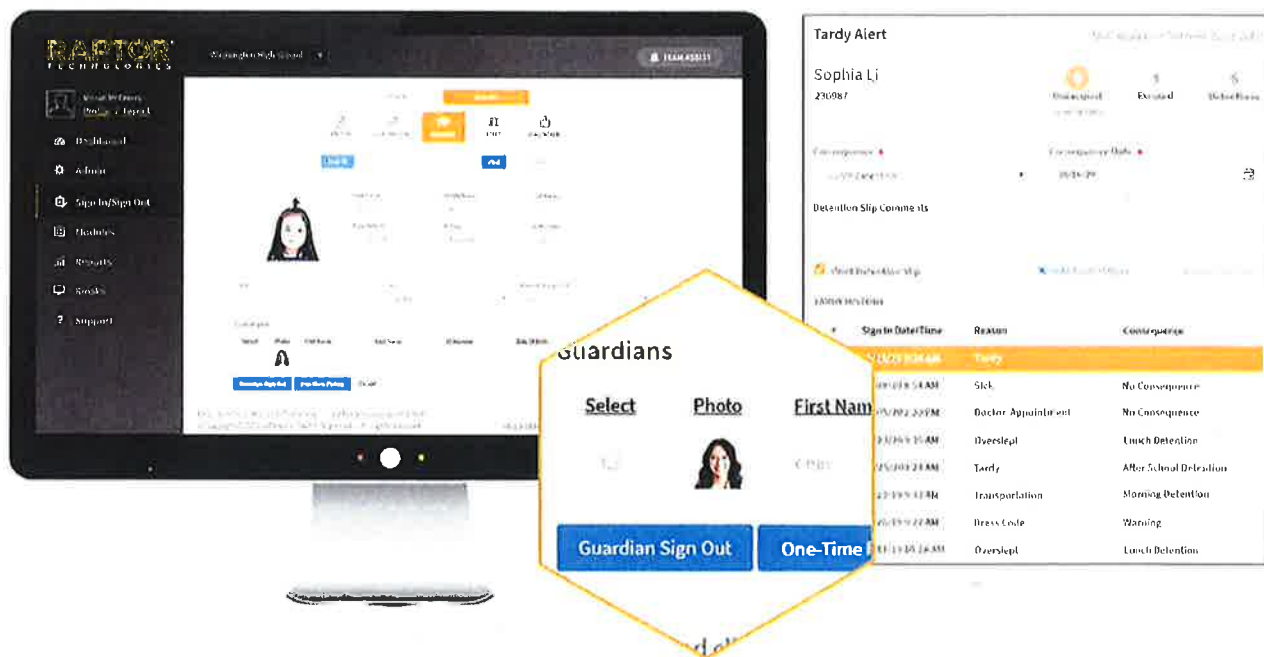

Highly visual emergency buttons on system desktop and mobile screens send instant voice, email, and text alerts to a customizable list of recipients. *Only available to Raptor Alert customers*

## STUDENT MODULE

The Raptor Student module tracks both student tardies and early dismissals. Tardy alert parameters can be set to alert users of student tardies, and tardy passes (as well as detention slips) can be printed. For student early dismissals, approved parents and/or guardians can be assigned to students and all early dismissal information can be logged electronically. Raptor seamlessly syncs with your SIS to ensure accurate student and guardian data is in your Raptor system.

### CONFIDENTLY RELEASE STUDENTS

Raptor instantly screens guardians against the sex offender registry in all 50 states and any locally customized databases, including custody databases, every time they sign out a student. You can be confident that you only release students to approved guardians. The Raptor system can quickly print early dismissal slips.

### ACCURATELY TRACK TARDIES

Search by student name or ID number to quickly display a student's record and mark the student tardy. You can select from a customizable list of reasons—missed bus or overslept, for example—and choose whether to print a tardy slip.

## TOO MANY TARDIES? RECEIVE AN ALERT

When a student accumulates a certain number of tardies—a number you can set—a Tardy Alert is displayed, showing the student's tardy record and letting you choose whether a consequence should be given, like notifying guardians or assigning detention. You can customize and print detention slips at the click of a button.

### KIOSK MODE FOR SELF SIGN-OUT

Approved students and guardians can use the kiosk to quickly check-out. Students simply scan their IDs, while guardians use the Quick Find feature to find the student record. Guardians are instantly checked against the databases before check-out.

### ACCURATE RECORDS & REPORTS

Student details and sign-in/sign-out records are recorded, so you can quickly create customizable reports such as student detentions by date, sign-in/sign-out history, and tardy count by student.
