

## **Glassboro School District**

### *July 2014 Monthly Update*

### **Summer Feeding Program**

This was the first year for the Summer Feeding Program in the Glassboro School District. There were many classes and training sessions that were required for this program. Walt Pudelko, Betty Anne Marchese, Ruth Arnold and Beth Clark all attended classes and trainings to insure the proper running of the summer feeding program. The program ran out of the Bullock School. It was well received in that location. The program ran smoothly for a first year program. There was an annual state inspection that is required. The state inspector was very happy with the program. Now the experience is there it will be an easier program for the district. We anticipate more participation as knowledge goes through the community.

### **Schools**

All schools went through the annual energy conservation program. Beth Clark met with Bob Killany discussed which kitchens can power down for the summer. The Rodgers and Intermediate Schools shut down totally for the summer. Bullock, Bowe and High School keep fridge/freezer units on. These units run more efficiently and save more energy being left on. All units get maintained regularly by Adams Refrigeration. The gas was also shut off to all schools except Bullock.

The High School staff lounge was painted. The High School art students are currently working on a mural in the staff lounge.

## **Nutri-Serve**

Beth Clark turned in to the district the 2013-2014 school year books and all related paperwork. There is an annual audit on these books. Mary Carey was pleased with the audit. Beth Clark met with Terry Grisi to go over summer deposits. This meeting helps greatly to help keep the bookkeeping correct all school year.
